DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13 and 23-34, drawn to a method and system for a use with samples or products comprising outputting at least one interest category; receiving information ;a nd requesting delivery of products, classified in class 705, subclass 26.
- II. Claims 14-22 and 35-42, drawn to a method for providing a user with samples comprising outputting a plurality of interest; selecting at least two interest from the plurality of interests and formulating a customized, personal interest category based on the selected at least two interested selected by the user, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as selecting at least two interest from the plurality of interest and formulating a customized, personal interest category based on the two interest. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3627

A telephone call was made to Mr. Jack Barufka on November 16, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
